

CLUSTERING RESULTS:

- **The number of clusters formed are 2**
- **Metrics Used:**
 - **Silhouette Score: A score of 0.513 which is closer to 1 is achieved. This indicates that the points are reasonably well matched to their own clusters and very well separated from other clusters.**
 - **DB Index Value: A score of 0.74 which is closer to 0 is achieved. This indicates that the clusters are well separated but not well formed.**
